## CHROME PLATING AND ANODIZING

Course No. 290.3

This one day presents common practices in the operation and control of chrome plating and anodizing facilities. Both hard chrome and decorative applications are discussed. Self inspection and electricity consumption logs required by the Air Toxic Control Measure will be distributed in both English and Spanish. Participants will also visit a local plating facility.

June 15, 2005 8:30 – 4:30 SJVUAPCD 1990 E Gettysburg Fresno, CA 93726

Class includes two afternoon field visits. Field visits and exam are mandatory to obtain a certificate of completion. **Please bring eye protection.** An enrollment fee may apply.
